

SUBSEA TURNTABLE AND PALLET

DESCRIPTION

Flowline Specialists' pallets provide an economical method of installing and storing jumpers, flexibles, umbilicals and cables.

The subsea deployment assembly – comprising of turntable, pallet and subsea deployment frame – is lowered to the seabed as a single unit, from where the product can be deployed.

Flowline Specialists has a variety of pallets to suit project requirements. Modular in construction the deployment assembly is road transportable.

For further information on Flowline Specialists' pallets and turntables, please see the relevant data sheets.

SPECIFICATIONS

Capacity	See pallet data sheet
