

## 2.8m DEPLOYMENT PALLET

### DESCRIPTION

Flowline Specialists' one piece pallets are suitable for subsea and topside cable, umbilical and flexible deployment operations.

The pallets can be used in conjunction with Flowline Specialists' low level powered turntable base (powered rotating base) and feature a support shelf fitted to the centre of the pallet.

Pallet posts can be relocated to suit the product MBR. A variety of post lengths are available in order to accommodate larger products. An additional support ledge can be fitted to the pallet for larger heads/stab plates.

The pallets are road transportable and the product can be spooled onto the pallet and stored until required.
